

RE: To seek planning permission for Rebuild of Barn 8, Abbey Farm, Alby, NR11 7HG in line with the existing Class Q planning permission but now falls outside its criteria due to necessary works

1. Introduction

- 1.1 This material log presents a comprehensive record of all salvaged historic materials that will be utilised in the reconstruction of Barn 8 at Abbey Farm. The careful deconstruction of the original barn, undertaken on safety grounds and in consultation with structural engineers, resulted in the successful salvage and storage of a wide array of historical materials. These salvaged materials, each with its own unique story and historical significance, will play a pivotal role in the authentic and faithful reconstruction of the barn, ensuring the preservation of its rich heritage and character.
- 1.2 The meticulous cataloging of these salvaged materials serves to not only document their individual provenance and condition but also to highlight their intrinsic value in the restoration process. As such, this material log stands as a testament to our commitment to historical preservation and sustainable development practices, showcasing our dedication to honouring the legacy of Abbey Farm through the thoughtful incorporation of its historical fabric into the rebuilt structure.
- 1.3 It is our hope that this material log will serve as a valuable resource, providing insight into the historical context and architectural heritage of Barn 8, while also demonstrating our unwavering commitment to preserving its identity for generations to come.
