Description of Proposed Works

Please describe the proposed works

Positioning of Mitsubishi Ecodan Ultra Quiet Air Source Heat Pump against the garden wall on the right hand side boundary when looking at the front of the house from the road. The back of the ASHP to be against the wall with a 300mm clearance to the back and 300mm clearance each side of the ASHP unit. It will be near to the garage. The pump will be concealed from view from the road by a timber wheelie bin store. This will be the best location in terms of efficiency in operation and also in terms of being unobtrusive, as discussed through site visits from my heating engineer.

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
