

Product Specification

Cycle Rack

Product Description

Wall-mounted bicycle rack for five bikes.

Provide practical bicycle parking for employees, students or visitors with this streamlined classic bike rack. The rack is designed for space-efficient wall mounting. It has three anchoring points for added security.

The bicycle rack takes five bikes with wheel widths of up to 50 mm. The bikes can be parked with either the front or rear wheel in the rack. This makes it easier to accommodate several bikes next to each other. The bike rack is made of electrogalvanised steel for wind and weather resistance.
