

PROPOSED SIDE ELEVATION
1:100

PROPOSED REAR ELEVATION
1:100

PROPOSED GROUND FLOOR PLAN
1:50

PROPOSED BLOCK/ROOF PLAN
1:500

- General Notes**
- This design drawing has been prepared for the purpose of applying for Planning Permission for the proposed development from the LPA. Full Planning Authority and Building Regulations Approval from Surveying & Design must be obtained for any work to be carried out on the site. The developer must ensure that the necessary permissions/approvals have been obtained in writing from all regulatory bodies.
 - All Planning and Building Regulation Conditions must be discharged by the homeowner or their building contractor before any work commences on site.
 - All new work to comply fully with the most up to date Building Regulation Legislation.
 - No covenants have been considered in the preparation of these plans and it is the Client's responsibility to advise if any such covenants exist that may affect the development proposal. The Client is responsible for obtaining consent to be issued from all parties with a legal (or other) interest in the subject property i.e. mortgage lender, developer/builder of the property, building warranty provider and inform their building insurer of the resultant increase in the re-building value.
 - All work including all demolition work and excavation work, to be carried out carefully and safely with all necessary propping, shoring and strutting. All work by the Principal Contractor and all Sub-Contractors must be undertaken in strict accordance with all relevant CDM Regulations, Health & Safety legislation, BS Publications, trade manufacturer literature and any requirements of statute or the local authority.
 - Figured dimensions must be read as opposed to dimensions scaled from the drawing at all times!
 - This drawing to be read in conjunction with all other relevant information whether produced by this company or by others.
 - Planning Permission approval does not constitute authority to proceed with building works where the Party Wall (etc) Act 1996 may apply. The Client/homeowner is responsible for compliance with this act prior to commencement of any building/excavation works and no liability is accepted by this company for the failure of the property owner to meet the requirements or provisions contained therein.
 - Build-over/Adjacent to public sewers - all foundations or structures within 3 metres of a public sewer are to be taken below the invert level of the sewer in accordance with the water utility company's requirements. The Client is responsible for organising, financing and obtaining all 'Build Over / Adjacent To' agreements before any work commences on site.
 - This Drawing must be read in conjunction with Design Surveying and Design's Outline Schedule of Works/Specification document and the Structural Engineer's design pack.
 - The PIC must thoroughly check and fully understand the Client's legal boundaries and check all siting-out for the development/works before any work commences. No part/component/structure of the proposed development to extend over the legal boundary. If in doubt then please ask.

Revisions	Date
A Amendment as per the client's requirement	14.12.23
