Comment Details

Commenter Type: Neighbour

Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I strongly support this application. I understand it:

1. is entirely consistent with both the intent of the agreement between the former Developer and the original Owner of this property
2. that the application is needed to tidy up non-material differences in its location compared to the original 2015 consents for this part of the site
3. caused by the former Developer's lackadaisical attitude to planning procedures and registered documents.
4. has no material visual or access impact upon the adjacent homes.
