

Project Addison House, 23 Green Lane, Fordingbridge
Project no. 2115
Date 12.12.23
Project Brief New development of 4 houses within grounds of existing house

Biodiveristy Statement

The proposed development at 23 Green Lane, Fordingbridge, is to provide 4 new, high quality, dwellings on an established residential site. It is therefore very unlikely that there will be have a harmful impact on biodiversity.

If any significant biodiversity was discovered during construction, measures would be taken to ensure it would not be harmed.

Bird boxes, swift bricks, universal nest bricks and bat boxes would be included in the construction of the new houses and garden areas to encourage a variety of birds and bats to nest safely on the site.
