

Ref PP-12666820 Mr Christopher Marfleet

The pergola is a free standing structure 9meters long x 3meters wide by 2.4 meters high. It has 6no legs fastened to the ground using chemfix. Which also supports the 3 No cross beams As you can see it perfectly matches the original building.

Its installed at the back of our property (Langdale in Utterby). The main purpose of the pergola is to keep the sun out of the Bungalow in the summer as the Bungalow was over heating and to allow for alfresco dining again in the summer.
