Essex Mammal Surveys

October 2023

Summary

As part of a planning proposal involving a former residential property at Pond Mead, High Street, Widdington, Essex CB11 3SB a, site visit was conducted on 27th September 2023 to determine whether the site had the potential to be occupied by protected species, which would be affected if any proposed development were to go ahead. At that time, the survey found no evidence of protected species at the site and the report concluded that: *'...therefore it is considered that the proposal for this site will not have a detrimental effect on the local bat population, or on protected species.'*

However, Condition 13 of the consent states: *'Prior to occupation of the development hereby approved, a lighting design scheme for biodiversity shall be submitted to and approved in writing by the local planning authority. The scheme shall identify those features on site that are sensitive for bats and that are likely to cause disturbance along important routes used for foraging; and show how and where external lighting will be installed (through the provision of appropriate lighting contour plans and technical specifications) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent bats using their territory. Thereafter, all external lighting shall be installed in accordance with the specifications and locations set out in the scheme and shall be maintained in accordance with the scheme in perpetuity. Under no circumstances should any other external lighting be installed without prior consent in writing from the local planning authority.'*

REASON: To conserve and enhance protected and priority species and habitats and allow the local planning authority to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife and Countryside Act 1981 (as amended), s40 of the Natural Environment and Rural Communities (NERC) Act 2006 (priority habitats & species), s17 of the Crime and Disorder Act 1998, in accordance with the adopted Uttlesford Local Plan Policies GEN7, ENV8, and the National Planning Policy Framework (2023).'

Background

Consent has been granted for the **Proposed subdivision of dwellinghouse to create 2 no. dwellinghouses. Proposed conversion works, demolition of conservatory, erection of single storey extension, and layout changes, including separate accesses for both plots, separate parking areas and ancillary driveways. at Pond Mead High Street Widdington Saffron Walden Essex CB11 3SB**

Photo 1: North-western elevation. The proposal is to refurbish the building to create two residential dwellings

Three external lights are to be introduced at the site and there will be no illumination of site boundaries that might have an impact on foraging by bats.

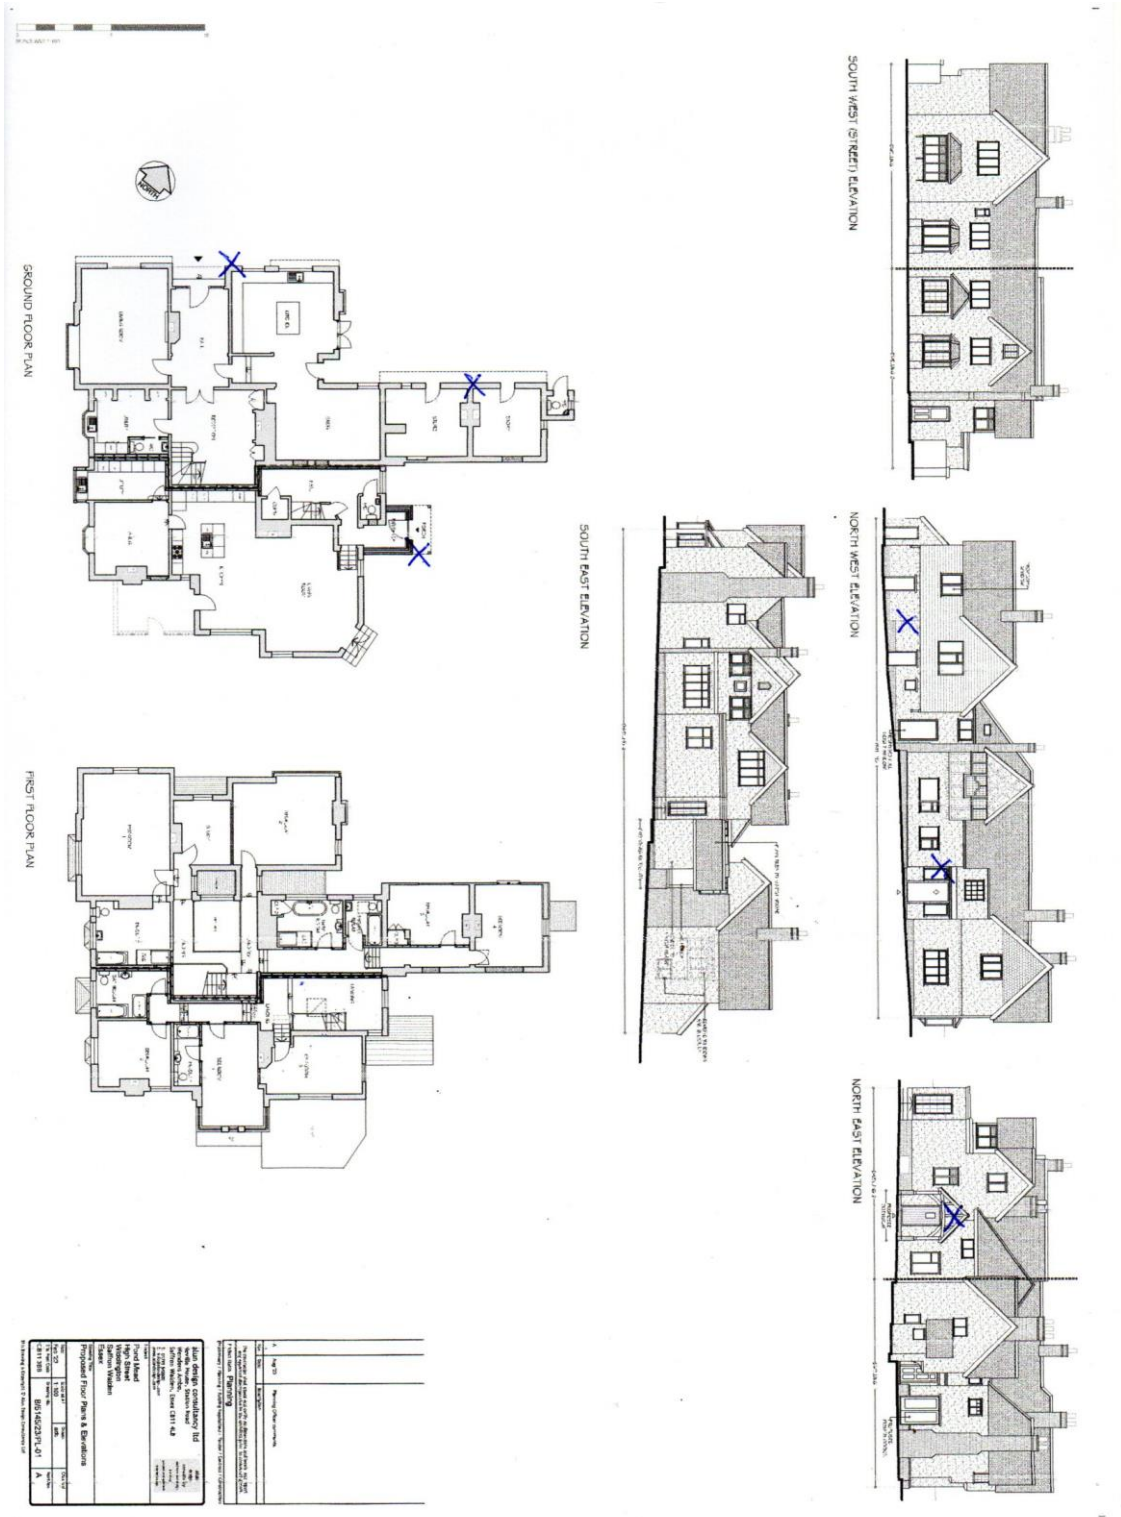

The lighting is to be at the front doors of both properties and by the stores. The lights will be downlighters as shown below, illuminating only the area by the access to the building. They will not be directed at any site boundaries (bats disperse along linear features) and will work on sensors or switched off after sunset. The lights will be sited around 2-3m from ground level.

The technical specification is as follows:

The lights are MCOB LED Lamps 40°, Warm White, Black IP65 + 5 Watt GU10.

Essex Mammal Surveys were requested to compile a lighting strategy with biodiversity recommendations at this site. The identification of protected species is vital in the proposed development of a site to comply with existing legislation and also allows any work that may otherwise be detrimental to bats to be appropriately scheduled. John Dobson, a bat worker and trainer licensed by Natural England (Licence No. 2015-15258-CLS-CLS) and author of *Mammals of Essex* (Essex Field Club, 2014), compiled this document on 29th October 2023. John Dobson has been elected a Fellow of the British Naturalists' Association and received the David Bellamy Award for natural history in 2015.
