- Yes
 No

Will the proposal increase the flood risk elsewhere?

- Yes
 No

From 7 January 2019, all new developments of more than 1 dwelling house or where the construction area is 100 square metres or more, require Sustainable Drainage Systems (SuDS) for surface water designed and built in accordance with the Welsh Ministers' [Statutory SuDS Standards](#). SuDS Schemes must be approved by your local authority acting in its SuDS Approving Body (SAB) role. Please contact your local authority for details of how to apply.

How will surface water be disposed of?

- Sustainable drainage system
 Existing water course
 Soakaway
 Main sewer
 Pond/lake

Biodiversity and Geological Conservation

To assist in answering the following questions refer to the help text. The help text provides further information on when there is a reasonable likelihood that any important biodiversity or geological conservation features may be present or nearby and whether they are likely to be affected by your proposals.

Having referred to the help text, is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

a) Protected and priority species

- Yes, on the development site
 Yes, on land adjacent to or near the proposed development
 No

b) Designated sites, important habitats or other biodiversity features

- Yes, on the development site
 Yes, on land adjacent to or near the proposed development
 No

c) Features of geological conservation importance

- Yes, on the development site
 Yes, on land adjacent to or near the proposed development
 No

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Details of the pre-application advice received

The principle of residential development is acceptable as the site is located within the settlement boundary as defined in the Local Plan in accordance with policy SP5 and the proposal is compatible with neighbouring land uses. The site is neither protected nor allocated but has a TPO Oak on site, is adjoining a protected woodland and adjoins a SINC site (NH3.1 River Rhymney). There is an employment site across the river. As such an arboricultural assessment, a noise assessment, a phase 1 habitats survey and a bat survey of buildings and trees is required. The advice stated that the proposed density is significantly lower than the recommended 30 dwellings per hectare and lower than the previous consent but noted that the density of the area varies considerably and whilst a lower density is more realistic an intermediate number of dwellings would be preferred. As the site area exceeds 0.15ha an element of affordable housing should be provided (up to 25%) and pointed out that the then extant consent for twenty dwellings with affordable housing outweighed the benefits that four dwellings would have in the context of the overall planning balance.

The site is located within the mid-range viability zone and is liable for CIL

Specific points of advice was provided re access and parking, waste and recycling collection points, the use of hard surfaces and landscaping, privacy and potential overlooking, coal mining as well as drainage issues. A FRA is required and a surface water drainage system that is approved by SAB.

As the proposal would create more than 1000 square metres floorspace there is a requirement to carry out a statutory pre-application consultation.
