

Existing Site Plan

1:50

T1 is to be surveyed on site to determine its root path and to be moved during construction to further along down the driveway, far enough away from the proposed building line to not impact the construction or use of the property.

T2 is a collection of bushes that are to be surveyed on site to determine their root paths and are to be relocated alongside T1 further along the driveway.

T1 is shown to the left of the image, within immediate proximity of the existing Log Store. T2 collection of shrubs/trees can be seen to the right of the image, again within a close proximity to the development area.

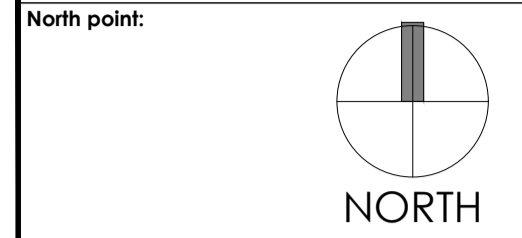

The dashed red line shows the proposed footprint of the extensions to the front(north) and rear(south) of The Anchorage

T2 is shown in relation to The Anchorage's front(north) elevation.
