Good morning Andi

I am working on your application and happily we are almost ready to validate, but we just have a query on the proposal. Your application states 'fell one dead eucalyptus and one deteriorating purple acer both on Scottsdale's site' – yet on the species plan provided in your previous email it is states 2 Maples (which could be classed as Acers also) to prune overhang. Do you still require a Purple Acer to be felled? If so where on the plan it is located? Also reduce back by how much?

To be clear this is how your application looks so far:-

Reduce back to boundary by 2m – 5m trees overhanging from the Hideaway, 35 High Street

comprising T1. Conifer Leylandii, T2 Beech, T3 Conifer Leylandii, T4 Beech, T5 Beech, T6 Ash, T7 Ash

On Scotdales Garden centre side

T8 Eucalyptus dead Fell

T9 Maple - reduce back to boundary by how much?

T10 Maple- reduce back to boundary by how much?

T11 Ash Diseased - Fell

We have to be clear with tree works applications as they are often checked by the public so information has to be correct, but if you could clarify and confirm the outstanding queries where necessary and email me, then I can proceed.

Regards,

Jan Ashley-Fenn | Technical Support

Hi Jan,

Please find attached our plan of species and works. I hope this now clarifies everything.

Kind regards

Good afternoon

Thank you very much for the information, all seems satisfactory now except we still do not have species which are overhanging the boundary. Please advise as best as you can please.

Regards,

Jan Ashley-Fenn | Technical Support

Subject: RE: 23/1397/TTCA Scotdales, High Street, Horningsea

Good Morning,

I have marked your plan with a blue box showing where the trees are. The trees that are overhanging into Scotdales are owned by Mr Ian Hull, 64 High Street, Horningsea. Ian just happens to be an employee of Fordham Landscapes Ltd and we have discussed at length the works with him.

Two of the trees (Ash & Eucalyptus) are in poor condition within the blue box and are in Scotdales grounds and are owned by them. These two will require total removal.

Reduce back to boundary varying between 2m and 5m. Height to remain untouched.

I hope this answers all your queries.

Please contact Mr Andrew Skinner on 07776 2049947 to discuss further and arrange a site meeting.

Kind regards

Good morning

Further to our conversation this morning there are a few discrepancies on the application

1. On the application the 'Location address' refers to where the trees stand – a further plan is attached so that we can see who we need to write to in relation to ownership.
2. The applicant seems to be Scotdales but you have stated that they owe the trees which does not appear to be correct? The plan should help in this respect though.
3. Finally, the tree works stated as 'side up' is not an appropriate description. It would be better to state - reduce back to boundary for example by 'x' amount of metres and reduce the overhang back to boundary by 'x' amount of metres.

Please contact us if you have any queries but we look forward to the clarification sought so that we can validate this application for you.

Regards,

Jan Ashley-Fenn | Technical Support
