

Joinery Schedule to Existing

- The precedent 6 pane flush casement single glazed window (see above and below) as noted by Mr Pinner will be restored as necessary, with close consultation with Mr Pinner when the casement and frame are exposed (currently behind secondary double glazing and render)
- The mullion window to the gable will remain as is, being behind a glazed screen in the weatherboarding (See below, East Elevation)

- All remaining storm casement design windows, (see photos below) will be replaced prior to re render, using the above 6 pane window as the precedent in esthetics.
 - Purpose made timber flush casement design
 - Glazing beads
 - Slim light glazing
 - Draught seals
 - Where necessary for means of escape, flying mullions.
