Vertical slider windows

Fully Sculptured Profile

- » The sculptured outer frame and sash will not only give you the traditional look of timber but also the performance benefits of PVCu
- » The interlock between the top and bottom sash will increase the weather and security performance
- » Flush fitting outer frame means no need to trim or plaster
- » Balanced, slim sightlines and a square travel stop cover will maximise the light whilst also giving you that elegant finish
- » Choice of hardware colour
- » Decorative horns – if requested
- » Low-maintenance
- » Easy cleaning
- » Secured by Design – POLICE PREFERRED SPECIFICATION*
- » Available in a vast array of coloured foils and woodgrains as well as all white

*Subject to specification.

12

Note that the units that will be fitted will not have astragals, instead the top and lower sashes will be single units in line with those previously fitted.

The pictures below show the windows which have already been fitted to the top floor of the property previously (ref planning approval 22/00037/DPP) which are of the same specification to those in this application.
