

Larch Cladding

Grown in Europe (Alps), the UK and Western Russia, this timber is one of the toughest and most durable softwoods available. It features a pale red-brown to brick red colour, straight grain and fine texture.

WHISKEY LARCH

Very similar to smoked Larch with the addition of Oils.
Rich colours from reds to orange, yellow and browns.

SMOKED LARCH

A very simple process with a striking effect of subtle chocolate like undertones.
Mainly used for interior but can be used on outdoor projects.
This may fade over a period of time when used externally.

SHADOW LARCH

Shadow Larch from our signature collection is one of our most popular finishes.
Rich dark tones with silvery highlights help make the stunning details of the Larch wood's grain stand out in almost any light.

DRAGON LARCH

Almost velvet like in texture and charred to a black finish.
Suitable for all kinds of insulations Indoor or out.
A further finish of Carbon Lock will further intensify the shadow effect.
Almost the perfect Blackwood finish.
