Dear Mia Witcher

Location: 16 Yareview Close Reedham Norfolk NR13 3SZ
Proposal: T1 & T2 Ash – (Fraxinus Excelsior) – Crown reduce canopy
between 1 – 1.5m

Thank you for your letter of 5 January 2024 re the above. I telephoned your office after Christmas to check that you had received my application and was told that a letter had been sent on 21 December 2023, this letter has never arrived.

I have submitted this application as these trees planted as part of the planning consent are totally the wrong species for our small garden. I consulted an arboriculturist who has made the recommendations submitted in this application.

It is a pity that the information which you are now requesting was not asked for on your application form.

I do not know which of the trees are T1 and T2 but would offer the following information which I hope will assist you in determining this application.

The tree in the corner is approximately 8metres high with a canopy diameter of 8metres.

The tree on the south boundary is approximately 9 metres high with a canopy of 6 metres.

Yours sincerely

David J Breeze
