

IMAGES FOR WENDRON CAR PARK (proposed installs shown against existing car park site)

View back to camera – 1

View back to camera – 1

Existing car park space to be 'sacrificed' for P&D machines and camera poles

Both camera columns will be installed in the above parking space, along with both payment machines and signage. The perimeter of the parking space will be fenced off creating a safe zone for motorists to pay.

Example of how the parking space will look once fully installed (not Wendron car park)

Location of payment machine(s)

Please note, in order to depict how the install will look, I have used an image from a previous install of ours and added in the extra components. The payment machines will be installed tight to the right-hand side yellow hoop in order to maximise queueing space. The stacked signage will also be doubled up in a back to back format.

Existing image from Wendron car park – P&D machines to be replaced with those in the car park space (shown above in illustration)
