

**EWYT135B-SLA1+OP204**

- > Air to water reversible heat pump
- > Scroll compressor
- > Standard efficiency version
- > Low sound configuration
- > R-32 refrigerant

- ➔ **Unit description:** Daikin air to water reversible heat pump with hermetic scroll compressors and R32 refrigerant. Unit colour is ivory White (Munsell code 5Y7.5/1) (±RAL7044).
- ➔ **Compressors:** Hermetic orbiting scroll designed for R32 operation and complete with motor over-temperature and over-current protection devices. Each compressor is equipped with an oil heater that keeps the oil from being diluted by the refrigerant when the chiller is not running. The compressors are connected in Tandem or Trio configuration on each refrigerant circuit. Each compressor is mounted on rubber antivibration mounts for a quiet operation. Unit is delivered with complete oil charge.
- ➔ **Water side Heat Exchanger:** The unit is equipped with a direct expansion plate to plate heat exchanger. This heat exchanger is made of stainless-steel brazed plates and covered with a 20mm closed cell insulation material. The exchanger is equipped with an electric heater for protection against freezing. Water connections are provided with Victaulic kit.
- ➔ **Air side Heat Exchanger:** The air side heat exchanger is manufactured with internally enhanced seamless copper tubes arranged in a staggered row pattern and mechanically expanded into lanced and rippled aluminum fins with full fin collars. An integral sub-cooler circuit provides sub-cooling to effectively eliminate liquid flashing and increase cooling capacity without increasing the power input.
- ➔ **Air side Heat Exchanger fans:** The fans are propeller type with high efficiency design blades to maximize performances. Fan blades are made of glass reinforced resin and each fan is protected by a guard. Parallel Coil units are equipped as standard with fan speed modulation (phase cut). Double V Coil units (standard and low sound versions) are equipped with on/off fans and inverter drive is available as an option. Double V Coil units reduced noise versions are equipped with inverter driven fans as standard.
- ➔ **Refrigerant circuit:** Each unit has one or two independent refrigerant circuits and each one includes: Compressors, Refrigerant, Water Side Heat Exchanger, Air Side Heat Exchanger, Electronic expansion valve, 4-way valve, Sight glass with moisture indicator, Filter drier, Charging valves, High pressure switch, High pressure transducers, Low pressure transducers, Oil pressure transducer and Suction temperature sensor.
- ➔ **Electrical panel:** Power and control are in the main panel that is manufactured to ensure protection against all weather conditions. It is IP54 and internally protected against possible accidental contact with live parts when the doors are open. The main panel is fitted with interlocked main switch door that interrupts power supply when opening.
- ➔ **Controller:** Latest generation MicroTech 4 controller provides an easy to use control environment. The control logic is designed to provide maximum efficiency, to continue operation in unusual operating conditions and to provide a history of unit operation. Sophisticated software with adaptive logic selects the most energy efficient combination of compressor load, electronic expansion valve position and fans to keep stable operating conditions and maximize chiller efficiency and reliability. One of the greatest benefits is the easy interface with LonWorks, Bacnet, Ethernet TCP/IP or Modbus communications.

**EWYT135B-SLA1+OP204**

Performances calculated according to EN14511-3

**Cooling mode performances**

|                        |                      |                                     |                               |
|------------------------|----------------------|-------------------------------------|-------------------------------|
| Cooling capacity       | <b>120.3 kW</b>      | Chilled water IN/OUT                | <b>12.00 °C / 7.00 °C</b>     |
| Power input            | <b>44.80 kW</b>      | Chilled water flow                  | <b>5.750 l/s</b>              |
| Cooling Efficiency EER | <b>2.687 kW / kW</b> | Water heat exchanger pressure drops | <b>48.8 kPa</b>               |
|                        |                      | Ambient temperature                 | <b>35.0 °C</b>                |
|                        |                      | Lw / Lp @ 1m                        | <b>87 dB(A) / 69 dB(A)</b>    |
| SEER / ηs              | <b>3.90 / 153.0%</b> | Fluid                               | <b>Water</b>                  |
|                        |                      | Water heat exchanger fouling factor | <b>0.000 m<sup>2</sup>C/W</b> |

SEER declared according to EN14825, fan coil application 12/7°C (inlet/outlet) water temperatures. Sound power level according to ISO 9614-1. SEER and IPLV.IP refer to standard unit without options

**Heating mode performances**

|                        |                       |                                     |                            |
|------------------------|-----------------------|-------------------------------------|----------------------------|
| Heating capacity       | <b>102.6 kW</b>       | Heated water IN/OUT                 | <b>49.00 °C / 54.00 °C</b> |
| Power input            | <b>48.27 kW</b>       | Heated water flow                   | <b>4.900 l/s</b>           |

**EWYT135B-SLA1+OP204**

Performances calculated according to EN14511-3

**Certification notes**

Certified in accordance with Eurovent Certification Program: Liquid Chilling Packages and Heat Pumps (LCP-HP). Standard ratings are specified in the section "Rating requirements" of the Rating Standards. All standard ratings are verified by tests conducted in accordance with the following standards: EN 14511-3:2013 (performance testing) and ISO 9614 (acoustic testing).

Outside the scope of AHRI Air-Cooled Water-Chilling Packages Certification Program or not optionally certified, but is rated in accordance with AHRI Standard 550/590 (I-P) and AHRI Standard 551/591 (SI).

**General notes**

For more information about the above selected product, please go to <http://www.daikineurope.com/industrial/>. Unit performances are reproducible in laboratory test environment only in accordance to recognized industry standards. This technical data sheet is generated by Daikin Applied Tool software designed and distributed by Daikin Applied Europe S.p.A.
