**Good afternoon, I am applying to widen my existing dropped kerb and also create a second (new) dropped kerb to allow us to drive in and out of our property. Currently we have to either reverse in across the traffic or reverse out onto the road, neither is easy and often relies on other drivers waiting.**

**I propose to leave a semi circle of garden wall and garden between the two dropped kerbs as demonstrated on the block plan.**

**We face onto a listed property but the new drop kerb would have no impact on the property or their exits.**

**Kind Regards**
