Reference 23/02667/CLP – Certificate of Lawfulness Application

To Whom It May Concern:

This application was made in April 2023, and until yesterday when I checked up online, I was not aware that this application had been refused. I did not receive any notification that this had happened. My client has an approved building warrant and has builders booked in to start the work at the end of January. Can you please fast track this planning permission application, where as well as uploading the relevant plans, I have also provided photographs of the site to assist in speeding up the application.

Yours sincerely
