Your Ref 23/11323

Dear Sir/Madam,

Thank you for your email and letter of 22 December 2023.

On review, we have decided that the second building mentioned in the statement will not go ahead at this time. We therefore hope that the enclosed will correctly support the application for a single new building at Fourjays Farm.

The supporting statement has also been amended for the single building:

Reference to the application at Fourjays Farm, we are now farming more ground than we have in the past. To this end we need a storage building to keep the machinery under cover. At one time of day, it would not hurt to stay outside, but now with all the electronics onboard, one needs to look after the machinery. Furthermore with the cost of machinery, replacement times have just got to be longer.

The design is suited to machinery being dry and secure and will be fitting between 2 existing buildings in matching materials.

I hope this covers the information you require, if not please do not hesitate to contact me on [REDACTED] or using the details above.

Yours sincerely

Jack Parsons. Partner
