

## Additional 1

Document to support tpo application at 43 castle oak, Usk, NP151SG.

1. Overview map showing location of trees.
2. T1
3. T2

Generally the trees are in good health and the owner would like to preserve them.

As a qualified arborist I have proposed the below in order to preserve the health of the trees.

T1 - Deadwood, lateral branch reduction and general shape

T2 - Remove major deadwood, heavy lateral branch reduction. Slight decay forming at base to be observed periodically.
