

Appendix 5.2

Heritage Designations

-  Development Boundary
-  Zone of Theoretical Visibility
-  Conservation Areas
-  Scheduled Monuments

Map Details

Map illustrates the Heritage Assets overlaid with the Zone of Theoretical Visibility to a 5km buffer area surrounding the proposed GM solar PV array calculated using the highest point of the panels.

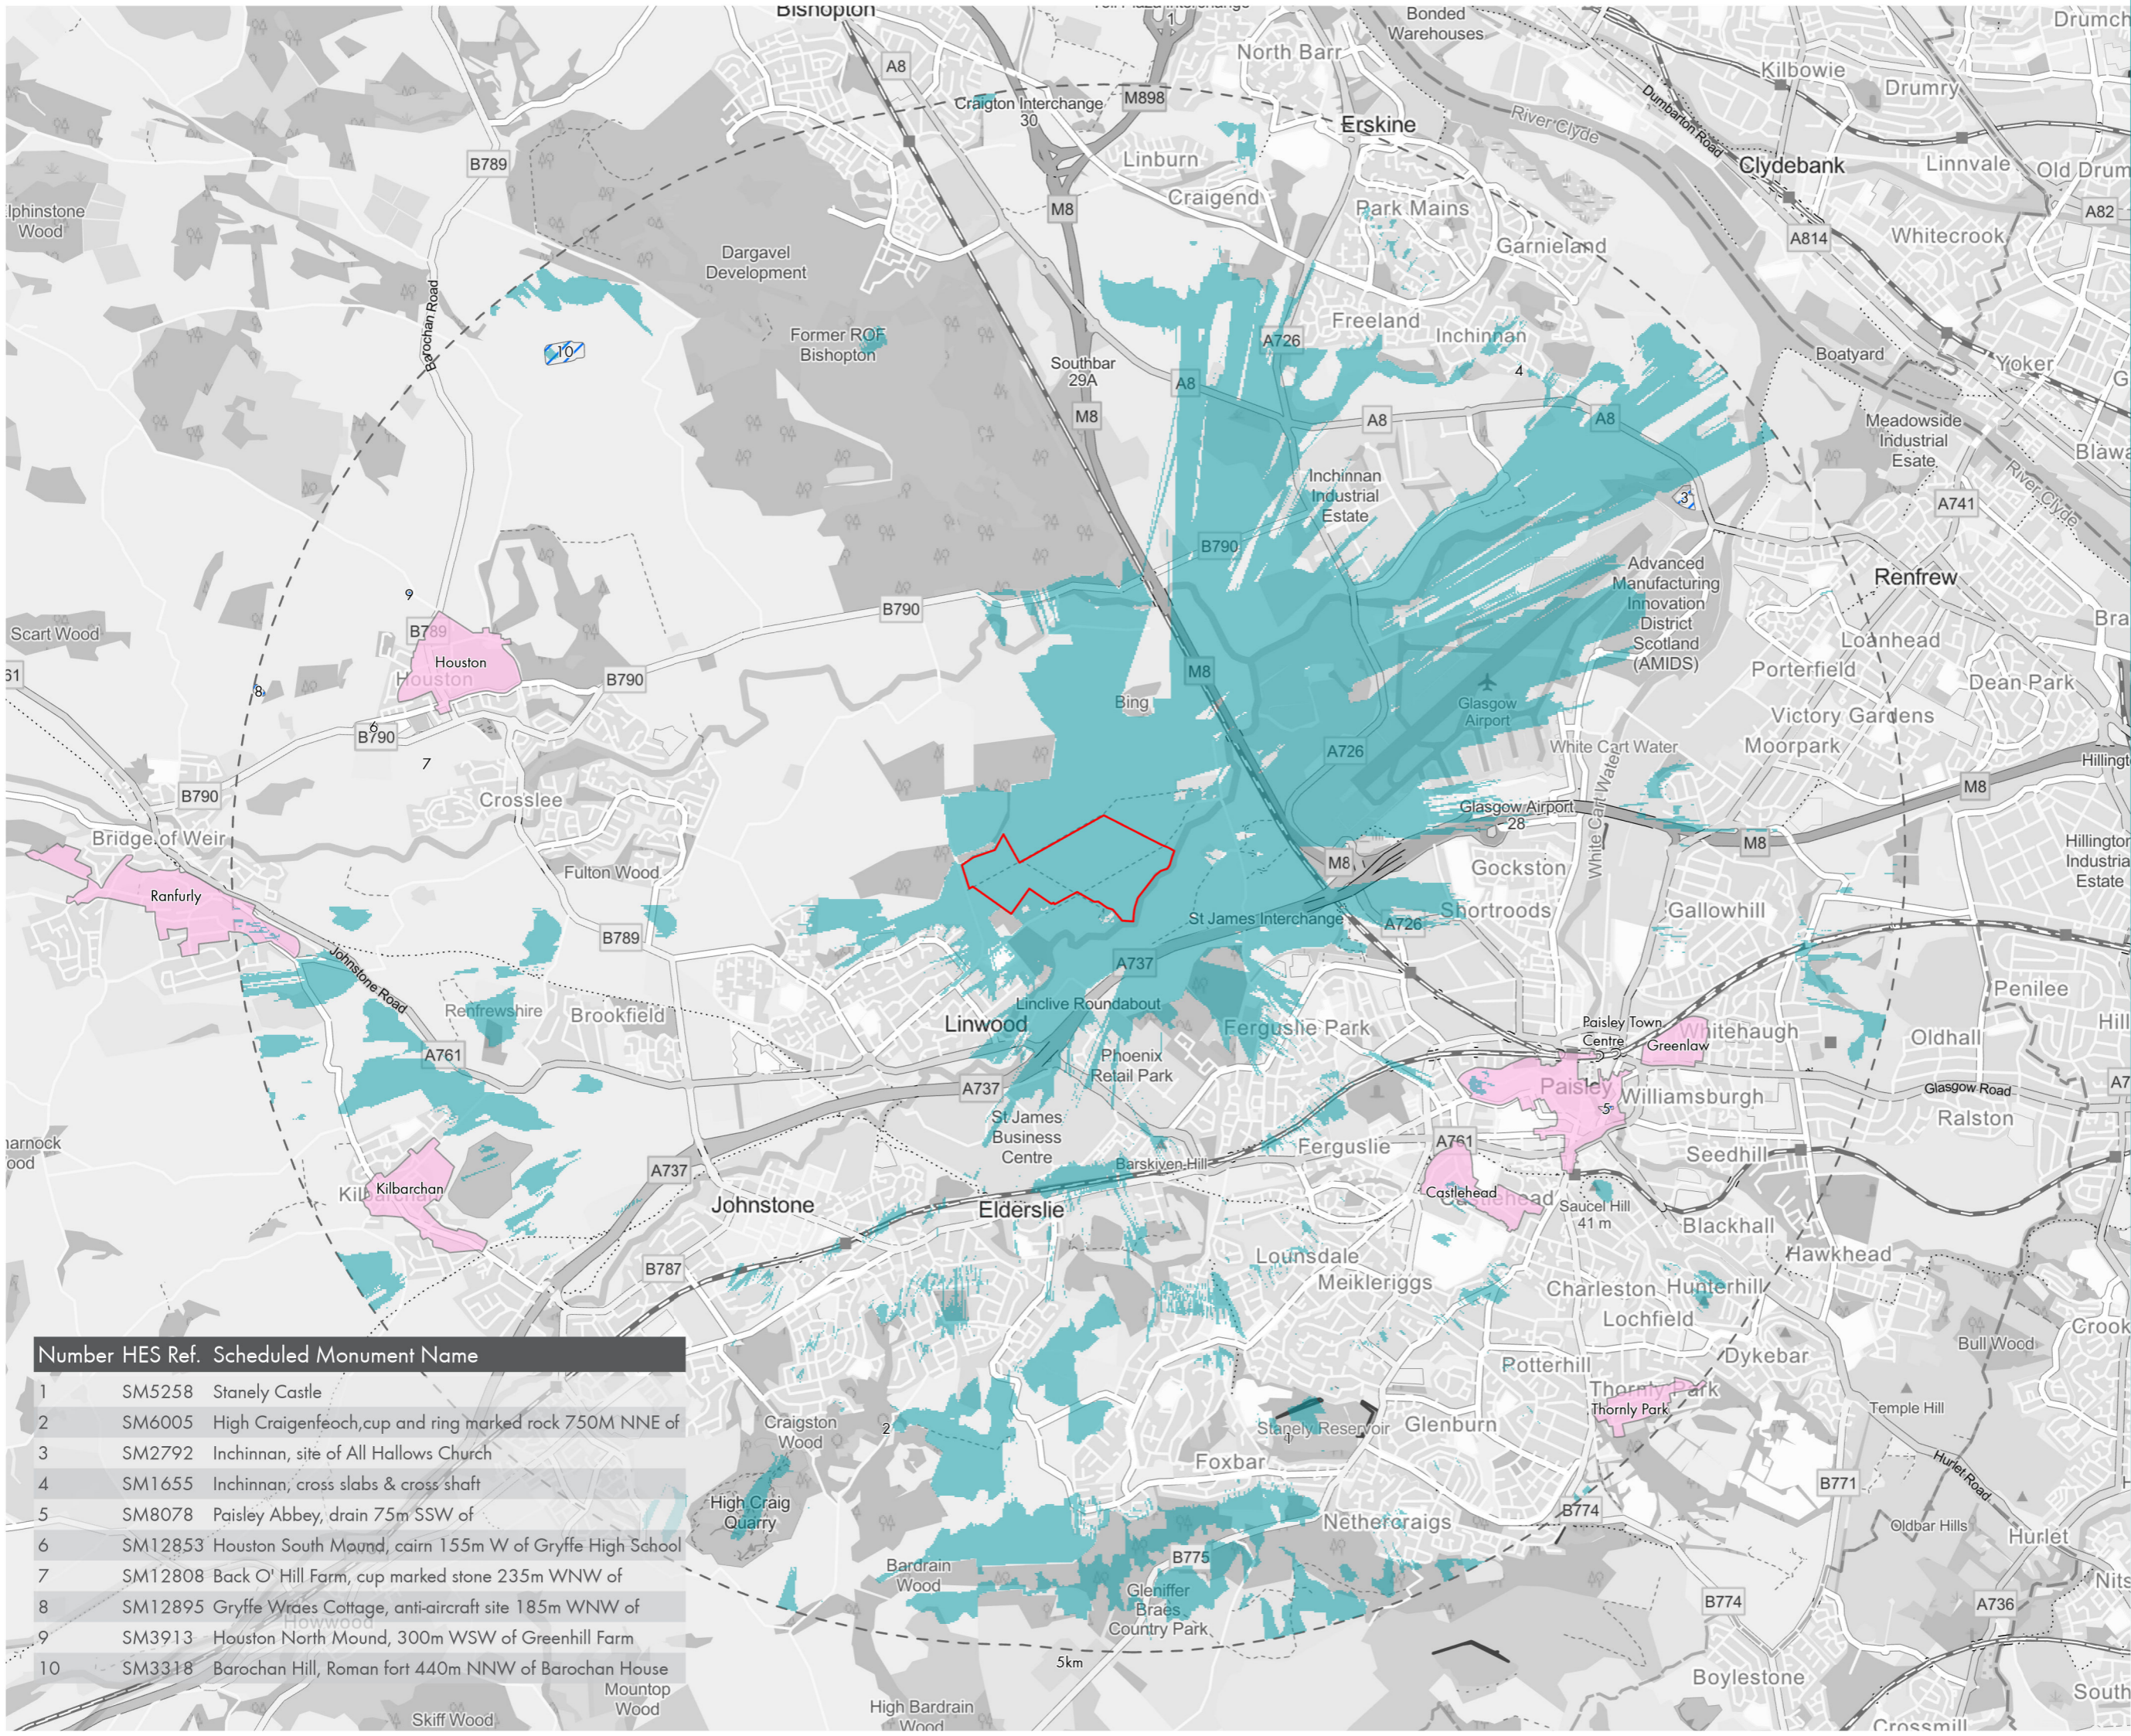

The ZTV is computer generated in ReGolf Windfarm V5 using OS landform terrain 50 data and takes into account natural and built features within the landscape. All barriers are considered by the software to obscure the development entirely with no demonstration of filtered views or partial screening. The earth's curvature and atmospheric refraction are included. Viewer height above the ground is 1.7m.

Scale: 1:40,000 @ A3
