

## Lighting and Walkway for Staff Car Park

The Greenway Hotel & Spa  
Shurdington  
Cheltenham  
Gloucestershire  
GL51 4UG

### **Application overview:**

The Greenway Hotel & Spa (part of Eden Hotel Collection) is a 16th Century Elizabethan manor house hotel set in eight acres of countryside grounds.

We are looking to install some low-level lighting, together with a gravel pathway, across the grass area between our staff car park and the hotel.

The area is currently not lit and presents a hazard for slips trips and falls, particularly in the winter months. We also propose to install some low-level lighting in the car park itself.

The lights and pathway will provide a safe and secure walkway / car park for our staff.

### **Lighting:**

Our light design and specifications are currently underway, with fittings sympathetic to the surroundings.

### **Pathway:**

We would propose our in-house maintenance team to create the pathway between the hotel and car park. We are proposing a gravel path with timber edging.

**Gates:**

The current gates in the car park also need replacing as they are not secure enough and are not in adequate working order for a car park that will be used daily, once lit and accessible. The posts will also need replacing to suit the new gate size / type.

**Current gate:**

**Possible gate options we would propose (indicative images only):**
