

Application for Tree Works at The Old Rectory, Alton Road, South Warnborough RG29 1RP

Map Ref	Species	Approx Height (m)	Age	Condition	Proposed Remedial Work
T1	Hornbeam	12m	Middle-aged	Good	Remove Reason: Significant overhang of lower branches into both the entrance to the immediately adjacent property and the main roadway to a further 3 houses including ours. This overhang is impeding vehicular access. T1 is in close proximity to another Hornbeam T2 and the removal of T01 will allow T2 to subsequently extend to largely fill the space created and establish a better overall shape.
T2	Hornbeam	13m	Middle-aged	Good	Minor trim (max 2.5m) of lower branches that overhang hedge into the neighbour's garden
T3	Maple	13m	Middle-aged	Good	Crown reduction to final height of 7m including minor trimming of lower branches to maintain proportional shape, as last undertaken in 2019. Reason: To undertake routine maintenance to provide balanced shape and to keep lower branches clear of boundary.
T4	Maple	13m	Middle-aged	Good	Remove Reason: Significantly restricted by 3 surrounding maturing trees (T3, T5 & T12) now making the area overcrowded. T4 is also very close to the boundary and significantly overhangs into the neighbour's garden.
T5	Maple	13m	Middle-aged	Good	Crown reduction to final height of 7m including minor trimming of lower branches to maintain proportional shape, as last undertaken in 2019. Reason: To undertake routine maintenance to provide balanced shape and to keep lower branches clear of boundary.

Map Ref	Species	Approx Height (m)	Age	Condition	Proposed Remedial Work
T6	Maple	12m	Middle-aged	Good	Remove Reason: T6 is only 1.2m from the larger T5 and close to the substantial fir tree T7. Overcrowding of these now mature trees makes T6 in need of removal to provide space for T5 & T7.
T7	Fir	12m	Middle-aged	Good	Crown reduction to final height of 7m including minor trimming of lower branches to maintain proportional shape as last undertaken in 2019. Reason: To undertake routine maintenance to provide balanced shape and to keep lower branches clear of boundary.
G1	Group of 3 small deciduous trees	7, 9.5 & 9.5m	Young	Good	Crown reduction to final height of 4m including minor trimming of lower branches to maintain proportional shape as last undertaken in 2019. Reason: To undertake routine maintenance to provide balanced shape and to keep lower branches clear of boundary.
T8 & T9	Pair of Lime trees	10m	Middle-aged	Good	Remove Reason: This pair of trees are closely surrounded by the group G1 and a further pair of Lime trees T10 & T11. All these trees were planted over 20 years ago on in close proximity to each other and are now too crowded. Removal of T8 & T9 will provide more space and light to the remaining trees with limited impact to the overall scene.
T10 & T11	Pair of Lime trees	10m	Middle-aged	Good	Crown reduction to final height of 6m including minor trimming of lower branches to maintain proportional shape as last undertaken in 2019.
T12	Willow		Middle-aged	Fair	No work to be undertaken
T13, T14 & T15	Small fir trees		Young	Fair	No work to be undertaken

Map Ref	Species	Approx Height (m)	Age	Condition	Proposed Remedial Work
T16	Acacia	12m	Mature	Fair for age	Remove a dead branch
T17	Sycamore	10m	Young	Good	Crown reduction to final height of 6m including minor trimming of lower branches to maintain proportional shape as last done in 2020. Reason: To undertake routine maintenance providing balanced shape and size to this fast-growing tree
T18	Acacia	16m	Mature	Fair for age	No work to be undertaken
T19	Sycamore	14m	Middle-aged	Good	Crown reduction to final height of 9m including minor trimming of lower branches to maintain proportional shape as last done in 2020. Reason: To undertake routine maintenance providing balanced shape and size to this fast-growing tree
T20	Acacia	16m	Mature	Poor	Remove due to dangerous condition Reason: Major vertical split in the trunk from the tree base for 2 metres revealing a hollow channel of around 20cm deep and significant decay of the core wood of the trunk. This old tree reflects poor health with lack of flowering, reduced leaf density and falling dead branches during windy weather.
T21	Acacia	16m	Mature	Fair for age	No work to be undertaken
