

Covering Letter

Proposal – 1.47 MWp Roof-top Solar PV (non-domestic building)

Please find attached all supporting documentation, to supplement our Prior Application Notice for the proposed installation. Please advise if you have any questions, or require further information, and we are happy to assist.

Due to recent changes in UK planning regulation, the proposed installation (exceeding 1MWp) no longer requires a formal planning application. On guidance and engagement with the Planning Portal, our application has subsequently been submitted on this basis. However, we are happy to provide further details if they are required.

Kind regards

Neil Beaumont
