34/1000 Box Profile 0.5 Thick PVC Plastisol Coated Roof Sheet

£13.44 inc VAT

About this product

Our 34/1000 box profile 0.5 thick roofing sheets, sometimes referred to as single skin box profile sheets that give robust profile roofing sheets strength. Incorporating 6 profiles of 200mm pitch across the sheet width and 32mm profile height, these are superb roofing sheets for home or commercial use. Some users prefer the appearance of these galvanised box profile sheets as it has lower and fewer profiles. It's made from a galvanised steel strip and gives 1000mm actual width cover when lapped.

Please note images may vary from actual item supplied due to lighting variations and camera angles

Features

Uses of Box Profile Roofing Sheets

Most commonly seen on industrial, agricultural and commercial buildings, box profile sheets can be used for domestic buildings where required. Available as a single skin profile sheet, it can be used to build up an insulated system, to over clad an existing roof or on its own to provide a solid weatherproof covering on any building. Suitable for roof application of 4 degrees or higher, consider purchasing our profile roofing sheets.

Benefits of Box Profile Roofing Sheets:

Fast and easy to fit, these lightweight box profile steel roofing sheets are an economical way to cover your building. Available in a traditional [Read More](#)
