

# Pierrepont Estates Management Ltd

## Heritage Impact Assessment

Property: Thoresby Courtyard, Thoresby Park, Newark, Nottinghamshire, NG22 9EP

Proposal: Installation of 10 CCTV cameras

The Objective of these works is to improve security around this building when it is not in use. Follow the recent break in at Lancers Museum, [REDACTED] security improvements have been recommended by Nottinghamshire Police.

One of the main objectives of these proposed works, is to give Thoresby Estate a system that provides us with advanced warnings of intruders out of hours at the Courtyard site. This will be communicated immediately to onsite security staff. The hope is this would prevent any break in or vandalism to any part of the building.

The installed cameras around the courtyard will be done as sympathetically as possible to the building. We have chosen black cameras and locations that will do its best to blend into the surroundings and building. All cabling will be running through the roof space and out of site.

The proposed works will help the estate sustain the historic value of the buildings at Thoresby Courtyard especially in detecting any vandalism around the site.
