

Very good morning,

I hope these images are helpful to indicate the reduction pruning points marked in yellow.

I do not require reducing the height of the Oaks at all only the lateral limbs coming into garden. From the pictures you can see the lawson cypress that requires reducing also.

A conversation was had with the customer ref a height reduction of the Lawson cypress but to gain the garden clearance asked it will only need a lateral reduction. All cutting will be done in accordance with BS3998 and with surrounding habitats in mind.
