Planning and Building Regulations:

All our Pent Roof Garden Buildings are designed to be lower than 2.5m high to be under the requirements for planning. All our Apex Roof Buildings below 3.0m wide are also lower than 2.5m high to the ridge. We advise that you check with your local authority to see if planning and building regulations are required. A free set of plans of the building will be supplied on request. An approved plan does not form part of the contract.
