

Grass/Gravel Grids

- Free-draining
- Wheelchair & Accessibility Friendly
- Suitable for Domestic & Commercial Use
- 500 tonnes/m² load capacity

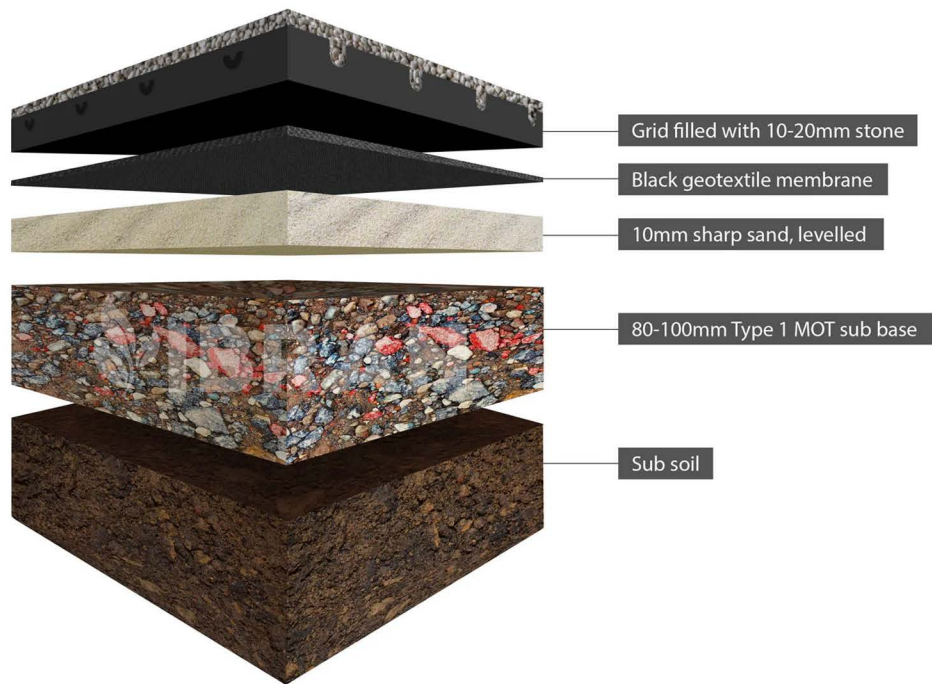

IBRAN-X gravel and grass grids are sustainably made in the UK using 100% recycled, weather stabilised polypropylene.

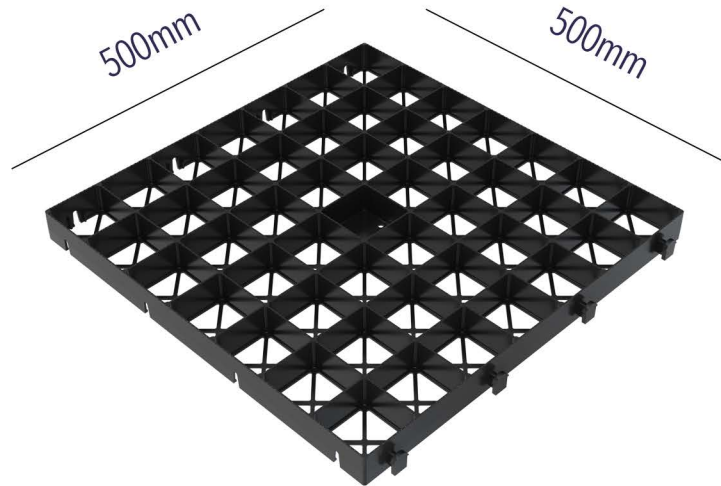

Strong, interlocking grids to create the perfect free-draining, affordable vehicle and wheelchair-friendly parking area, driveway or footpath.

Correctly installed, IBRAN-X gravel and grass grids have been tested to take up to 500T/m².
Following our simple installation process guarantees the surface for at least 25 years.

The grids are fully permeable, allowing uninterrupted flow of water from the top surface through into the sub base below, saving cost on additional drainage installation.

Full Specifications:

500mm x 500mm x 40mm

Pre-moulded interlocking clips

Fully permeable

SuDS and Part M/Section 4 (Scotland) Compliant

UV and temperature (-50°C to 90°C) stable

957g/grid

240 grids/pallet

Suitable for gradients up to 10%

"X" mesh & pocket/anchor cell to prevent migration
