Description of Proposed Works

Please describe the proposed works

The proposal is to re roof areas of the rear timber conservatory.

There will be no change to the existing elevations.

A scaffold tower will be erected to the front of the conservatory to access the roof.

All of the glass will be removed carefully from the roof and side panels leaving only four panes of glass to let light in on the apex nearest the house (2 either side) and the front facing glass on the apex.

The roof and all areas will then be boarded using a grade 3 osb board. This will be fitted on top of the timber construction throughout.

The two sloping roofs to each side will be felted using a 3 layer torch on membrane to a completed finish.

The main pitch to the roof will then be lathed and felted using breathable membrane and 25mm by 50mm batten.

New fibre cement tiles will be fitted to cover the main pitch of the roof using lead strips to seal onto the remaining glass areas.

All ridge tiles will be used to complete the apex.

The side cheek triangle areas will be leaded using code 4 lead and have a detailed overlap on each section of lead.
