## 2. Proposal

Supply and Installation of a Help Point system. Modification of the existing power supply to provide additional capacity.

TDM are well versed in Listed Building work and are sensitive to the Heritage of the building, striving for the minimum intrusion of new conduits and equipment.

## 3. Help Point

TDM's Standard Two Button Help Point is a GSM unit. These Help Points are able to provide assistance directly to the customer.

Standard Two Button Help Point offer a reliable high quality solution.

### 4. Containment

Existing containment will be used where possible and in keeping with the original station containment if new containment is required.

## 5. Historical Context

The original Hove railway station, situated further to the east, opened on 11 May 1840 by the London & Brighton Railway, on its line from Brighton to Shoreham-by-Sea, designed by the architect David Mocatta. It closed on 1 March 1880, and the site became part of *Holland Road Goods Depot.* A wooden halt named Holland Road Halt was also opened a short distance to the west in 1905, served by local trains towards Worthing and on the branch line to Devil's Dyke.

The present Hove station was opened on 1 October 1865. It was originally named Cliftonville, then West Brighton, before being renamed Hove and West Brighton in 1894 and finally Hove in 1895.

Preceding station			Following station
Brighton	Southern West Coastway Line		Aldrington or Portslade
Preston Park	Southern Brighton Main Line		Portslade

### 6. Potential Access Issues

No access issues have been identified.
