Re-pollard Willow tree over pathway and encroachment abatement reduction pruning along building.

To re-pollard the Willow tree growing from the river and over the footpath, back to the original pollard points (approx. 7 metre reduction), to prevent failure from the weight of the regrowth. Works to the Willow tree will be undertaken using rope and harness. They will also cut back encroaching branches from the side of the store to enable a 1-2m clearance where possible from the mixed species trees.
