10th September 2023

Dear Sir,

REF: 18/10801 ,

Further to our discussions regarding the above project I now submit the application to vary the condition 1 of planning permission 18/10801, along with the revised plans and elevations.

The changes to the plans were required by Building Control, to permit lobbied access to the front entrance, and to separate the kitchenette from the means of escape. The alterations to the front windows were again a requisite of the Building inspector to allow for a stronger corner construction of the front elevation.

If you would like to discuss any of the points covered in this letter please do not hesitate to contact me.

Yours sincerely,

Bob Chivers
