

Planning Ref no 24/00132/TW - further notes

Tree 1 - Reduce Crown by up to 20%

Tree 2 - Remove

Tree 3 - This has a considerable number of lower branches and also a considerable number of crossing branches. The request is to remove a number (4-5) of the lower branches and also remove 3-4 of the crossing branches. In total the maximum reduction would be 30%

Tree 4 - As Tree 3 but less extensive work is needed. Reduce by up to 20%.

An improved plan is also included which shows the neighbouring properties. Due to the topography of the area there are very few properties affected by this and the only one in reality is 2 Undercliff Gardens - the bungalow next door and this would be impacted only by Tree1. It would reduce some shade in the early mornings for their garden.

Matthew Parr-Burman - [Redacted]

T1-4 = Trees
