Explanation for Proposed Demolition Work

The existing building has structural issues that compromise its integrity and safety. Having been built during the 1940s, construction methods are inferior to that of today and renovating or preserving the structure would be financially impractical due to extensive repairs needed. The existing dwelling is no longer able to provide the functional needs of modern life and demolition is the more viable option. Constructing a new modern single storey dwelling, will incorporate eco-friendly materials and designs, contributing to environmental sustainability. **Existing Use** Please describe the current use of the site THE SITE IS CURRENTLY USED FOR A DOMESTIC DWELLING Is the site currently vacant? ○ Yes **⊘** No Does the proposal involve any of the following?
