

Travel Plan Report 2023 – 2024

Clifton Park Hospital

Travel Plan Initiatives

As outlined in the associated Travel Plan, Clifton Park Hospital has introduced measures to make staff aware of the alternatives to single-occupancy car-use and promote more sustainable travel choices.

This report will assess the impact and efficiency of those measures and if required make further recommendations.

Active Initiatives

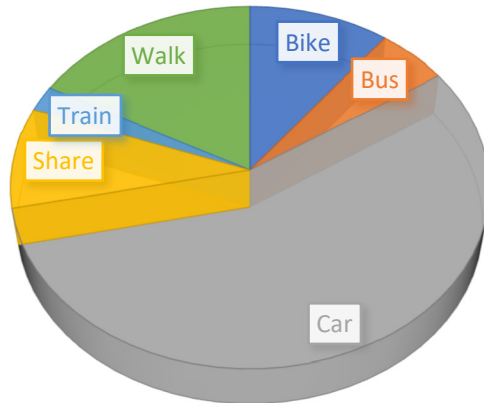

- All new starters at the hospital are required to complete an induction day, information on sustainable travel choices are discussed in a session as part of the induction.
- Staff are able to obtain a Sustainable Travel Pack from the Human Resources Coordinator on site which contains information on bus routes & times, train routes & times, cycle routes, pedestrian routes, as well as information on the benefits to both the environment, body and health of sustainable travel.
- Staff notice board with sustainable travel information including bus routes & times, train routes & times, cycle routes, pedestrian routes, and promoting the benefits to the environment, body and health of sustainable travel.
- Sustainable travel is discussed in team meetings to remind staff members of the literature available to them.
- Umbrella pool at main receptions and outpatients department reception.
- Changing and showering facilities are available for the use of staff that walk or cycle to work.
- Drying areas for wet weather gear used by walkers and cyclists are available.
- Cycle to work scheme is available to all staff.
- Car-sharing is encouraged.
- Arrangement with neighboring businesses to utilise car parks for staff so patients have easy access to the buildings and ample spaces to park.

Survey Results

A survey of all staff and their modes of travel was conducted and the results are as below:

Travel method	No. of staff	Percentage
Bike	14	10%
Bus	7	5%
Car	75	56%
Share	12	9%
Train	3	2%
Walk	23	17%

STAFF METHOD OF TRAVEL
