

MAKE AN ENTRANCE

custom-built high security composite doors

Visage[®]

Visage® BEAUTIFULLY MADE REASSURINGLY STRONG

Historically, the choice of entrance doors has been limited to PVCu or timber doors. Composite doors have become more widely available, and with more choice than ever. Our superior glass reinforced plastic (GRP) composite doors have high impact resistant skin with a beautiful woodgrain finish which gives an authentic and premium aesthetic.

Tried, tested and trusted.

The front door is used every day. It protects us and our possessions and helps keep our home safe and warm. All the while, we expect it to look good, and stay looking good.

Our Visage door range combines innovation and simplicity with the performance you'd expect from a modern composite door.

The skins on our door are manufactured from GRP. They are compression moulded to give a high definition panel design which offers authentic timber appearance and the thermosetting manufacturing process means that they are unaffected by variations in temperature.

The stiles and rails are of a water resistant composite material and are bonded to the skins. The insulating core consists of 100% CFC-free polyurethane which provides superior thermal performance and enhances the doors soundproofing. The finished product is a door which is strong, stable, durable, secure and which is indiscernible from timber.

Outer Frame

Specially designed 70mm uPVC outer frame with dual seal weather proofing and a choice of thresholds to meet every requirement including new regulations for mobility access.

Glazing

24mm toughened safety glass double and triple glazed units with a choice of decorative glass to further enhance the appearance of your door. All doors come with high security multipoint locking with a choice of finishes that meet the requirements of the latest security standards.

Stunning Aesthetics

Visage door range features our latest innovation where the flush-fitted innerframe sits level with the moulding to give sleek lines and a finish which is unsurpassed.

Low Maintenance

Your Visage composite door has been designed to be easy to maintain. To keep the door clean, prolong the life of the surface finish and protect your warranty, we recommend you wash it regularly using warm soapy water (washing up liquid is ideal) and a soft, lint-free cloth.

Quality you expect

We have the best product in the market by far. Our superior Visage doors have a high impact GRP resistant skin with a beautiful woodgrain finish which gives a Visage door an authentic and premium aesthetic.

Engineered wood

For improved stability.

Water-resistant composites

Thanks to the water-resistant polymer composite rails, our doors will help keep water absorption away, this helps prevent a bowed door that could happen with solid timber core composite doors on the market.

Reinforced core

The reinforced central board gives you extra reassurance that your Visage door is both solid and secure.

Secured by Design Upgrade available

"Secured by Design" is the official UK Police initiative supporting effective crime prevention and security standards for a large range of products.

- The SBD logo is the only symbol that guarantees national Police approval of the product.
- Visage doors meet the "Police Preferred Specification" and such are "Secured by Design".
- SBD option will improve your security and you may even get a discount on your home insurance cover.

Technical Specification

1. Steel reinforced 70mm PVCu frame, extruded to B7413 specifications
2. Adjustable high security hinges
3. Cassette system with 24mm toughened or laminated glass unit
4. 3 point Yale multipoint locking system with high security hookbolts that meet police preferred security specification
5. Fully sealed door leaf to prevent water penetration
6. Embossed woodgrain texture for traditional look and feel of timber
7. Stylish stainless steel handles for ultimate corrosion free performance with a "slam shut" option
8. Stylish stainless steel 180° letterplates for ultimate corrosion free performance
9. Optional high performance, low aluminium threshold providing wheelchair access, improved looks and weatherability.

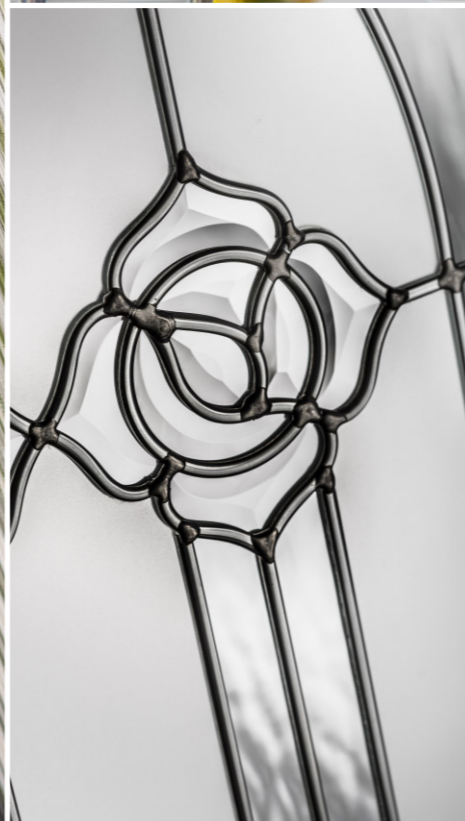

The benefits of purchasing a GRP Door

Energy Efficient

The rising cost of energy bills and the impact on the environment means we all want to keep our consumption to a minimum. Tests prove that a Visage door is 19% more thermally efficient than a 48mm solid timber core composite door and 17% more thermally efficient than a 44mm traditional timber panelled door.

Exceptional Security & Durability

Our GRP composite doors offer enhanced security thanks to its rigid polymer sub-frame, high density insulated core and high impact resistant GRP skin.

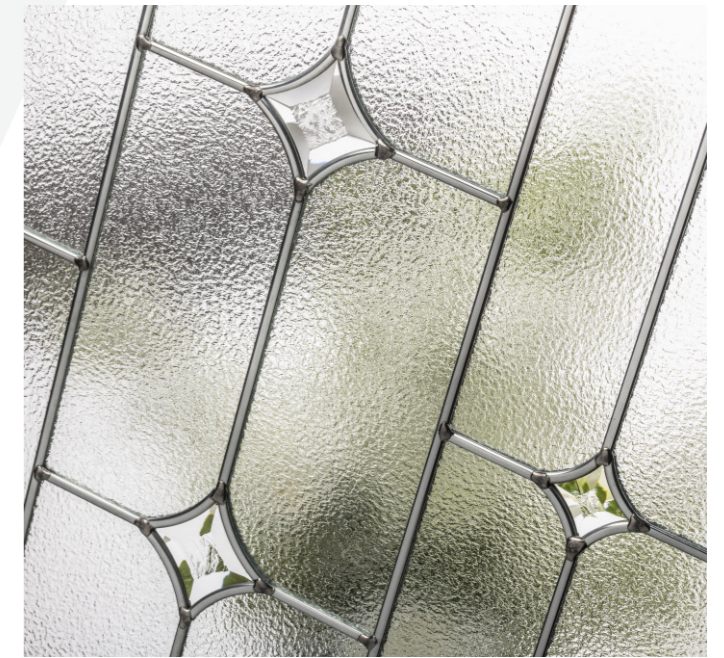

New Orleans detail

Crystal Flower detail

A decorative glazing panel adds style and personality to your door whilst letting natural light fill your home. Designed to keep in the warmth and with a large range of different designs, colours and glass patterns to choose from; you are able to give your door the perfect finishing touch. Once you've chosen your door it's time to turn your attention to the detailing - deciding which glazing perfectly suits your choices, your home and your personality.

As the Bamburgh is a number one choice among our customers we now provide a far greater selection of decorative styles. Many of our glass models are brand new and are reflective of the very latest technology in the industry. All decorative designs are hand crafted and small inclusions and uneven surfaces are all part of the handcrafted character of the glazing and should not be deemed as a fault.

SIDE SCREENS

It has been an industry problem for some time that when composite doors have non standard side panels the decorative glass does not match well or at all across the whole doorset. We are now proud to offer a solution to this problem with a lavish range of suited adjustable side panel options.

Key Benefits

Each decorative design is perfectly suited to carry luxury decorative glass designs from the door through to the side panels. Our side panel combinations are available in various sizes and colours.

Our range of stunning Inox glazed doors combine the high performance of GRP composite materials with beautiful style to give a truly contemporary look to any entranceway.

This range of doors use stainless steel glazing frames to the outside, which as well as adding a distinctive European flair, are guaranteed to keep their high shine and stunning looks for years to come.

This door features a fixed stainless steel bar or bow handle on both sides. On closing, the door will automatically lock and the key is needed to gain entry from outside.

If you prefer a plain look, choose satin glazing. Glazing has built in obscurity – see page 4.

Our composite doors feature multi-point locking, securely fastening the door to a reinforced frame with a combination of hookbolts and deadbolt. Additional option of a traditional slam shut facility.

Locking options include:

- Handle operated hookbolts as standard
- Slam shut facility* whereby when the door is closed it can only be opened from the outside with a key
- Stable door locking, features handle operated hookbolt and deadbolt to top, thumb turn operated and deadbolt and internal shoot bolt to bottom.
- Autolocking options.

* Please note that for complete security the locks should be fully engaged by lifting the handle and engaging the key

Heritage finger pull escutcheon

- Eliminates the need for handles.
- Complements both contemporary and period door designs, with the key escutcheon fitted to the top section of door.
- On closing, the door is locked on the latch and the key is needed to gain entry from outside. Full security is achieved by turning the key to engage the deadbolt.

For the Ultimate Security Cylinder Upgrade choose YALE Platinum 3*

- Advanced multi pin tumbler mechanism
- TS007 3 star Kite-marked Secured by Design
- Sacrificial external side designed to leave the door secured after a snap attack
- Anti-snap, anti-pick, anti-bump, anti-drill, anti-screw
- Supplied with 3 Yale branded dimple cut keys
- Unique key identification for added security
- Available in double or thumb-turn variants
- 10 year guarantee

We are proud to present a fine collection of precision hand crafted luxury 316 grade stainless steel pull handles. Core ranges are available as both a traditional round pull and as an ultra-modern rectangular handle and both come in a wide selection of sizes. We have also added our brand new luxury black handles which carry some impressive and unique benefits. Smooth black handles can suffer from hairline scratches but our handles have a specialty textured black finish which is not only aesthetically pleasing and particularly modern but also is far more resistant to surface scratches.

Carefully curated in-house, our non-toxic, odourless, low emission and eco-friendly bespoke paint range offers something different.

Discover deeper, richer tones; classic and delicate neutrals; and shades designed to bring joy. Each door is sprayed by one of our skilled paint specialists, using the very latest technology in one of our paint booths. This ensures a flawless finish, every time. We paint every door by hand so there's a perfect colour match between the door and moulding on the glazing cassette.

You can choose a colour for both inside and out, and they don't need to match.

For a more accurate representation of our colour range, ask for a hard copy of our colour chart.

Disclaimer: Colours shown should be used for guidance only as the limitations in the printing process may mean that colours vary from those illustrated.

We're confident you can't buy better!

The outward appearance of most replacement doors can be almost identical, but don't be fooled into thinking that all composite doors are more or less the same. The quality of materials, construction, overall design, locking and weatherproofing systems can vary immensely from manufacturer to manufacturer. To help make you aware of the features you should consider when buying composite doors, we've listed the main things to look for on this easy to use checklist. The specifications shown are standard on every Visage® door (unless shown as optional) and, as one of the very best systems on the market, we're convinced you can't buy better. But don't just take our word for it!

	Visage
U-values as low as 0.9 W/m2K.	✓
