Description of the Proposal
Please note in regard to:
<ul> <li>Fire Statements - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. View government planning guidance on fire statements or access the fire statement template and guidance.</li> <li>Permission In Principle - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.</li> <li>Public Service Infrastructure - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or view government planning guidance on determination periods.</li> </ul>
Description
Please describe details of the proposed development or works including any change of use
Change from hardstanding to outside temporary gazebo and seating area with removable material roofing to provide a dry seating/standing area for patrons. This will also enable a clear separation from surrounding businesses & stop clientele from disturbing neighbouring businesses during evening hours. The structure has been completed as we were unaware that it may fall into the scope of needing planning as it is a small temporary structure, needed mostly through the winter months. It was urgently needed for its shelter, to protect from high winds

and rain, to give a safe outside space for those still worried about contracting covid & for the overall look of the business from the High Street.
It also enables us to hang heat lamps & safe lighting. The left side of the structure is built alongside an existing wall & iron fence and the fence
aspect of the gazebo only rises a small height above this existing wall. The front of the structure follows the boundary line that used to house a
metal gate which subsequently was replaced by a high bench seating area. The right of the structure joins the front to an existing wall of the
neighbouring property & the roof beams are below the height of that existing wall. We have had many positive comments about how it
improves the look of the area.

Supporting information requirements
Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.
Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.
Your local planning authority will be able to advise on the content of any assessments that may be required.
