

Item: 06

Notes

- Take down pine framed sign. (2415x1220x70mm wxhxd). Remove acrylic panel and plywood from rear and put extra peggings in. Make frame good in one corner. Shave 12mm off width of frame. Make new pan white to cover frame to finish at 2413mm wide 1220. Add 3 lockable black painted display cases to the face of the panel 700x1050, there would be an additional cost for this option.
