Mahmud ,

After inspecting the Cherry Tree at your property today,

21 Nascot Wood Rd
Watford
WD17 4WE

On inspection of the Cherry Tree, it was clear that there was a major amount of deadwood in the crown of the tree causing it to have little life left within it. It was also clear that the tree was dying from a disease. After speaking to the client, he showed me the amount of broken limbs that have fallen from the tree.

Many thanks,
Sam
