

Soil Management Plan

Address: Bower Hill, Batts Corner, Dockenfield, GU10 4EZ

Proposal: Single storey side extension and porch

Area/Footprint: The extent of the extensions are 49sqm to the rear.

Impacts on soil:

- The extent of the works will have a limited impact on soils due to the limited size of the extension.
- It is almost certain that the extension will be on a piled raft as the area is heavy clay and has significant vegetation. This involve little soil removal or disturbance.
- Top soil can be re-used to level out the site as the house is built on a significant incline.
- There will be no removal or introduction of soil onto the site.
