Ecosystems Services Statement

Proposals

It is proposed to install sixteen solar PV panels on the flat roof of the detached garage flat roof. The main property will be unaffected by the proposals.

The proposal relates only to a private dwelling house.

Sustainably Manage Land and Water Environments

We do not consider the proposed alterations will have an adverse impact on the above.

Protect and Provide More, Better and Joined up Habitats

We do not consider the proposed alterations will have an adverse impact on the above.

Conserve Water Resources and Improve Water Quality

We do not consider the proposed alterations will have an adverse impact on the above.

Manage and Mitigate the Risk of Flooding

The property is not located in a flood risk zone. The proposed alterations will have no detrimental impact on flooding to this property nor the surrounding area.

Improve the National Parks Resilience to, and Mitigation of, Climate Change

The new solar PV panels are environmentally sustainable and thus will reduce the carbon footprint of the dwelling.

Increase the Ability to Store Carbon Through New Planting or Other Means

We do not consider the proposed alterations will have an adverse impact on the above.

Conserve and Enhance Soils

We do not consider the proposed alterations will have an adverse impact on the above.

Support the Sustainable Production and Use of Food, Forestry and Raw Materials

We do not consider the proposed alterations will have an adverse impact on the above.

Reduce Levels of Pollution

The new solar PV panels are environmentally and thus will reduce the carbon footprint of the dwelling.

Improve Opportunities for Peoples Health and Well Being

The proposals will not adversely affect people's health and wellbeing.

Provide Opportunities for Access to the Natural and Cultural Resources Which Contribute to the Special Qualities of the National Park

We do not consider the proposed alterations will have any impact on the above.
