

# Tree Survey

## ① Goat willow

- ~~Tree~~ <sup>Remove</sup> due to multi stem structure with compression forks, included unions, basal cavities and rot along with numerous fungal fruiting bodies
- Tree is over roofline of dwelling, oil tank and access road

## ② Fig

## ③ Ornamental fig

## ④ Portuguese willow

②, ③ and ④ remove as inappropriate planting for location and root systems begging to interfere with historic wall. The boundary walls are high and block views of these trees from any neighbouring properties. We want to replant within the garden boundary.
