New first floor level fire exit door as required by fire safety regulations for safe usage of the existing mezzanine level inside. Door to be solid and coloured to match existing exterior decor so as to be as unobtrusive as possible.

New first fire floor level landing area to act as a refuge area as required by fire safety regulations for safe evacuation procedures in the event of fire.

Staircase and handrail shown here in colour for clarity purposes only. Installed metalwork to be powder coated or painted to match existing exterior steelwork, namely the existing handrails and existing structural pillars and beams.
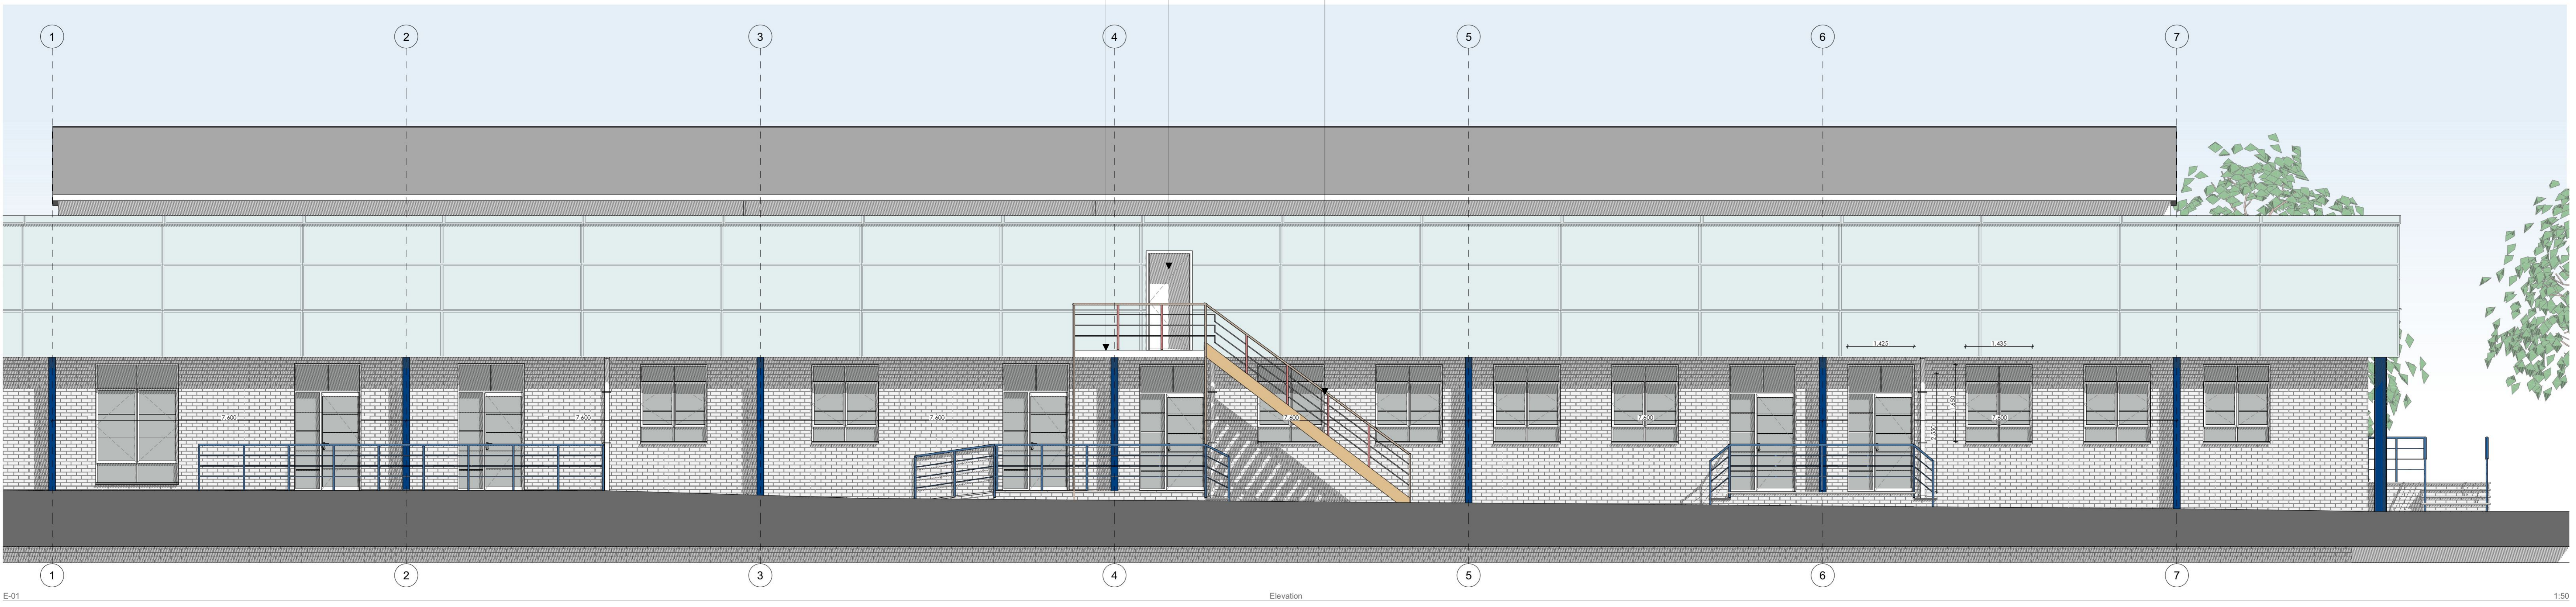

E-01　　　　　　　　　　　　Elevation　　　　　　　　　　　　1:50

E-02　　　　　　　　　　　　Elevation　　　　　　　　　　　　1:50

Exterior staircase and landing to extend from the main building no farther than the existing ground floor handrails.

Scale 1:50
