

Full description and reason for works

Fell 1 no. Conifer, and 1 no. Poplar tree after storm damage, and Fell 5 no. Poor quality Conifers.

I live in Southampton, but own a property at 4 Pingle Lane, Morcott. The property has been let since October 2018 and were advised by the tenants in January that a top of a large Conifer had broken off partially destroying my tenant's chicken coop.

Tom Udale from Special Branch Tree Services attended and has advised me that as well as removal of the broken tree top, other work is also needed:

Fell 1 x Broken Conifer.

Fell 1 x Poplar tree.

Felling of 5 x poor quality Conifers.

If you carry out a site visit, you'll see that some more Ivy banding and further general scrub clearance work, etc is still required.

My wish is to replace these with new native trees to be planted after the work, if approved, is completed to help bring the garden back to life.
