## Description of Proposed Works

Please describe the proposals to alter, extend or demolish the listed building(s)

Proposal to change four timber windows which have perished beyond repair. Due to the huge amount of heat loss and the considerable operational cost of the building, I am concerned with the sustainability and impact that the current window solution has.

The old windows will be replaced with new traditional timber butt casement windows designed to increase thermal efficiency and sustainability. They will be double glazed and painted white to match existing and neighbouring windows. These are slim glazing units with true glazing bars which are individually puttied in. The glazing units will be 14mm wide with white thermal spacer within the units. There will be no trickle vents. The iron mongery will be from a traditional selection as shown in the documentation: Stay bar and handle in monkey tail antique black and stainless steel butt hinges. These hinges will be installed in a traditional way as present.

Front elevation - 1 x Lounge window; 1 x Bedroom, 1 x Bathroom

Rear elevation - 1 x Bedroom
