

Renewable & Low Carbon Statement

R/O 34 Chiltern Drive
Barton on Sea, BH25 7LB

The site currently houses an existing double garage. Adding a dwelling on this underused plot makes more use of existing infrastructure and is therefore a more sustainable use of the site.

The proposed building will be constructed to a high standard and will be compliant with current Building Regulations. This will ensure that it is thermally efficient and energy requirements are as low as possible.

The applicant intends to use energy efficient and renewable products and materials.

Proposed Products/Materials to be used include:

Underfloor heating – possibly linked to Air Source Heat pump.

LED lighting.
