

There are three Georgian bar designs available on Everest Products, these are:-

- a) 18mm wide Cavity bars to form standard square grid within a sealed unit.
- b) 18mm wide cavity bars (box bar) designed to be bent to form radius and suspended designs of which there are six styles.
- c) 25mm wide Cavity bars to form standard square grid within a sealed unit.

**CAVITY GEORGIAN BARS**

(see fig 1,2,3 & 4)

18mm and 25mm cavity Georgian bars are available on all our sealed unit products. The style can be specified by input "C" on the laptop followed by the number of panes across each panel and down each level in accordance with the specified product rules (see Georgian section within the appropriate product survey manual).

18mm wide special cavity (box bar) Georgian arrangements are specified by the input of "A" on the laptop, but a DS201 MUST be produced for each design fully detailed and dimensioned (see Georgian section applicable to product being surveyed).
