maxlight

We believe that your home should be a warm, bright space that lets you unwind with your loved ones.

A place to socialise and a place to lock yourself away. It's a place to relax and a place to work. It's a place to entertain and a place to cuddle up. Our doors and windows make the most of your space, so let the light in and see the difference it will make.

A place in your home to
disconnect together

➤ Double Sliding Doors

Our simple yet effective double doors slide in either direction to give a spa configuration, with no fixed panel required.

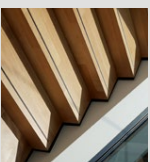

> Triple Sliding Doors

Our breathtaking triple doors offer a two-thirds opening configuration, sliding left or right with no fixed panel required.

14

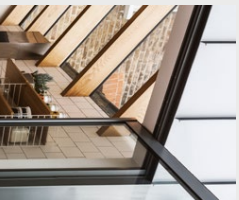

15

> Centre Parting

Add a breathtaking divide to your room with our centre parting door. They open in the centre and slide outwards over adjacent panels, with an incredibly slim 40mm profile in the centre. All the panels have 20mm profiles and come in a variety of configurations to suit your needs.

➤ Pivot Doors + Roof Lights

Pivot Doors

Give your home a contemporary design statement with Pivot Doors. There are no hinges needed as the door uses a unique pivot mechanism and available in a variety of configurations.

Rooflights

Let the light flood in with our range of rooflights. Turn a gloomy space into a bright, welcoming place with one of our many rooflights.

Skymax

Skymax is our high performance, thermally efficient rooflight system, designed to the same exacting standard as our Maxlight doors. Bring the maximum sky and light into your home. We always have standard sized rooflights in stock for immediate delivery, so please call our office to find out more.

> Oriel Bay Windows

Bay windows are the showpiece of a room. Choose your configuration and we will have oriel bay windows to fit you.

> Glass Boxes

Glass box structures are perhaps the most impressive architectural glazing project you can embark upon for your home. They create wonderful spaces that often feel boundless in every direction and are joyously full of light.

Opening Corners

Inject a touch of flexibility to your room with Opening Corners, two sets of doors closing onto each other at 90 degrees. When open, you will have a fully exposed corner to allow natural light to flow into your room.

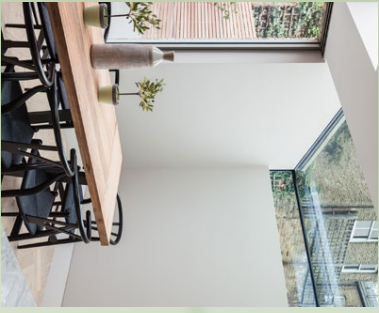

> Industrial Style

Nothing is more contemporary than industrial style doors, an industrial twist on classic doors. They have slim frames for maximum light, perfect for any setting and are available in a selection of colours and configurations.

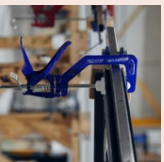

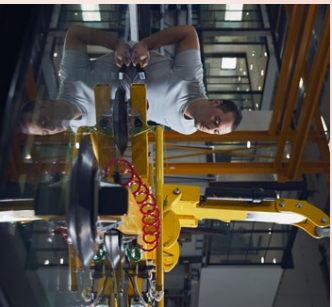

➤ Made with care

Everything is made here in London, in one of our two factories. We deep clean every pane of Maxlight glass using a special UV cleaner that highlights the slightest blemish. If the glass isn't flawless, it is rejected.

Our aluminium is machined to within a fraction of a mm and each frame is then assembled and reassembled to ensure a seamless fit. We always keep more stock than we need, in more colours than we need, for every component we use. So you never need wait because we need to order a part.

This is all much more effort for us, but well worth it for you.

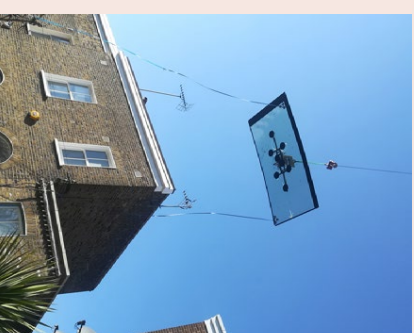

➤ Bringing Maxlight into your home

Maxlight surveyors visit every site 8 weeks ahead and meticulously check the job details to ensure a perfect fit and smooth installation.

Your fitter team will be made up of 2-8 people and, on occasion, a robotic arm. They complete most installations in 2-3 days.

Lastly, we conduct a detailed final inspection with you and your nominated builder or architect to check you are totally happy. And then, all that's left is for you and your family to relax in to your new space.

Unrivalled security

Home is the most important place in the world. At Maslight, we go to great lengths to ensure the place most dear to you is safe and secure. All of our Maslight doors lock with a key, not with a latch or thumb turn. Our rebuilt deadlocks are made so that they can be operated by a key from both sides and designed to meet the most stringent of insurance policies. With us, you will be covered for every eventuality.

Details matter

Your home has to be perfect. With our wealth of knowledge and experience, our technical design team is on hand to help overcome any challenge that you may have. We pride ourselves on the detail-orientated service all the way from our drawings to installation so that you achieve exactly what you want time and time again.

Colour

Our doors can be powder coated to any standard RAL colour in matte, satin or glass finish. That is 188 colours to choose from, which is 22 more than the industry standard.

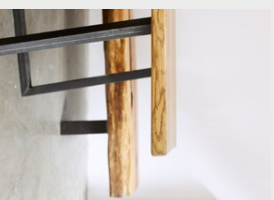

Any type of glass

All Maslight doors are double glazed, argon gas filled with a layer of low E glass to help keep you warm. They are constructed from toughed glass for strength, security and peace of mind. You can also pick low iron glass, tinted and coloured glass, solar control glass (which we recommend if you plan to hang art in your new space), and more.
